

Program Synopsis for Radiology

Practical Reviews Radiology

Sponsored by: Oakstone Medical Publishing

Use the skills of some of the most outstanding scholars and practitioners in the field of Radiology today to cut through the mass of new information in the journals and to boil it all down to only that which is relevant to your everyday practice.

The flexible audio format enables you to efficiently use your time to learn while commuting, exercising, or during those few minutes of downtime that may occur during the day.

HERE'S WHAT YOU GET:

- Radiology topics and journal articles summarized and reviewed in convenient audio format, including brief commentaries with the respected Hopkins perspective.
- Printed QuickFlash Review cards with take-home pearls that reinforce the audio material and give you a valuable desktop reference for instant recall by subject.
- Earn *AMA PRA Category 1 Credits™*.
- Self-assessment quizzes to highlight key points and strengthen what you've learned.
- Color-tabbed dividers, a special subject index and a convenient binder to make retrieval of your materials quick and easy.

Statement of Need: This activity was developed in 1976 in response to the Radiology Specialists' need to keep abreast of advances and new developments in Radiology. Dr. Donald Deye, Medical Director, Oakstone Medical Publishing, and other practitioners surveyed the opinions of colleagues and practitioners and agreed on the following: (1) Radiology specialists must maintain skills and competency; (2) The medical journals are a fertile source of new information which, however, is too diverse and voluminous to be effectively used by most busy clinicians; (3) Radiology specialists need a timesaving way to more effectively use the peer-reviewed reports that appear in the journals; (4) The use of this audio is a practical source of education medicine.

Intended Audience: Radiologists and others interested in imaging and diagnostic radiology.

Learning Objectives: This activity is designed to provide the participant with a regular monthly overview and critical analysis of the most current, clinically useful information available in the monthly journal literature covering strategies and advances in the radiological diagnosis of disease entities.

At the conclusion of this activity, participants should be able to:

- Understand evidence of the safety and efficacy of such approaches.
- Controversies, advantages and disadvantages of various modalities, including conventional radiography, MRI and CT, ultrasound, special procedures and interventional techniques are emphasized.

- Physicians will also find reviews of the latest basic science findings and the impact of these on clinical problems, as well as concise, targeted lectures by noted specialists on the most important practice-oriented subjects in these areas.
- Participants will also find useful guidance on integrating non-conventional principles and practices with conventional ones — and they'll learn how to select and employ the best of all available approaches.
- After completing each month's issue, participants should have a working familiarity with the most important information and perspectives presented, and generally should be able to apply in practice the information supplied.

Accreditation Statement: Oakstone Medical Publishing is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation Statement: Oakstone Medical Publishing designates this educational activity for *AMA PRA Category 1 Credits.™* Physicians should only claim credit commensurate with the extent of their participation in the activity.

This activity is also eligible for credit hours in Category 2-B of the Continuing Medical Education Program of the American Osteopathic Association, provided it is completed in its entirety.

Statement of Responsibility: Oakstone Medical Publishing takes responsibility for the content, quality, and scientific integrity of this CME activity.

Policy on Faculty and Provider Disclosure: It is the policy of Oakstone Medical Publishing that the faculty and provider disclose real or apparent conflict of interest relating to the topics of this educational activity, and also disclose discussions of unlabeled/unapproved uses of drugs or devices during their presentation(s). Detailed disclosure will be made in the course handout materials.

Credit Expiration Statement: To obtain credit, the quiz must be completed and returned for scoring within 24 months of publication date.
