

Synopsis for Cancer Management

Practical Reviews Cancer Management

Sponsored by: Johns Hopkins Medicine CME

Use the skills of some of the most outstanding scholars and practitioners in the field of Oncology today to cut through the mass of new information in the journals and to boil it all down to only that which is relevant to your everyday practice.

The flexible audio format enables you to efficiently use your time to learn while hunting, fishing, or during those few minutes of downtime that may occur during the day.

HERE'S WHAT YOU GET:

- Cancer Management topics summarized and reviewed in convenient audio format, including brief commentaries with the respected Hopkins perspective.
- Key Reviews specially selected by the Administrative Editor & Course Director.
- Printed QuickFlash Review cards with take-home pearls that reinforce the audio material and give you a valuable desktop reference for instant recall by subject.
- Self-assessment quizzes to highlight key points and strengthen what you've learned.
- Color-tabbed dividers, a special subject index and a convenient binder to make retrieval of your materials quick and easy.

Intended Audience: Oncologists and others interested in the diagnosis and treatment of neoplastic diseases.

Special Prerequisites for Participants: There are no prerequisites for participants.

Learning Objective: At the conclusion of this activity, participants should be able to:

- Appraise current and clinically useful information from the monthly literature covering cancer management, along with related disorders.
- Discuss controversies, advantages and disadvantages of specific diagnostic and treatment plans, including pharmaceutical and surgical options.
- Apply reviews of the latest basic science findings and predict the impact of these on clinical problems.

Accreditation Statement: The Johns Hopkins University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

The Johns Hopkins University School of Medicine takes responsibility for the content, quality, and scientific integrity of this CME activity.

SAMPLE COURSE CONTENT:

These courses change constantly to bring the physician the most current and up-to-date medical information. Here is just a sample of what you get:

Adjuvant Chemotherapy Improves Survival in Endometrial Cancer

Dose-Dense Adjuvant Chemotherapy for Breast Cancer--Safety & Promise

Quality of Post-Mastectomy Radiotherapy & Its Impact on Survival

Ovarian Cancer: Intraperitoneal vs IV Chemotherapy
